Projects

Job Portal Website (PHP)

A PHP based job portal website to connect recruiters and job seekers in a convenient way. Recruiters can post job recruitments, view all the candidates that applied to job, search candidates profile etc. Job seekers can search through various jobs, view jobs by company, location, domain etc.

Pet-Adoption Website (MERN)

Using MERN stack, a pet adoption website is developed to encourage society to adopt pets in an easier way than buying expensive pets. Adopters can browse through all pet profiles, contact their owner for further

communications, save favorite pets for future. People can also list their pet for Adoption

Weather App (React Native)

A simple react native app using Weather API to display weather details for the city.
